PINECL Parent Training Taking Shape

The PINECL Team have been working intensely over the summer months to create a new and tailored training programme for parents with pre-school children aged between 0 – 6 years exploring the core themes of **Early Childhood Development, Early Language Learning & Parenting Supports.**

Our team hard at work, Pitesti, Romania 2014

Not satisfied with empowering parents with practical training, advice and strategies to complement their innate parenting skills and experience, the PINECL team is seeking to create equitable, respectful and sustainable local networks of parents and practitioners in rural areas of Ireland, UK, Italy, Romania and Cyprus to promote Early Childhood Learning through social networking channels.

We are proud to announce also that our Training Programme will address the professional skills development of parents and will offer accreditation under the UK system of APT (EQF Level 4)

Building Networks to Support Parents Locally

Research demonstrates that the more involved parents are in their children's learning and development, the greater chance children have to succeed.

Through the Parents Academy and training programme, parents will gain new skills and confidence and identify new ways to contribute to their rural communities.

In order to support this work, we have created new induction programmes for professionals and we will be delivering them in spring 2015 in addition to a series of networking, animation and conference events.
